FOR THE EASTERN DISTRICT OF TEXAS
MARSHALL DIVISION**

PERSONAL AUDIO, LLC

Plaintiff,

v.

CBS CORPORATION,

Defendant.

Civil Action No. 2:13-cv-00270-JRG-RSP

Jury Trial Demanded

PERSONAL AUDIO, LLC

Plaintiff,

v.

NBCUNIVERSAL MEDIA, LLC,

Defendant.

Civil Action No. 2:13-cv-00271-JRG-RSP

Jury Trial Demanded

DECLARATION OF ADAM A. PORTER

I, Adam A. Porter, Ph.D., affirm and declare as follows:

I. Background

1. I am a Professor of Computer Science at the University of Maryland at College Park, and have an appointment with the University of Maryland Institute for Advanced Computer Studies. I am also working as a Visiting Scientist for the Software Engineering Institute at Carnegie Mellon University. I have been retained in this case by counsel for the Defendants. I expect to testify regarding the matters set forth in this declaration, if asked about these matters by the Court or by the parties' attorneys.

II. Summary of Declaration

2. I understand that plaintiff, Personal Audio, LLC, has asserted U.S. Patent 8,112,504 (the “‘504 patent”), entitled, “System for disseminating media content representing episodes in a serialized sequence,” against the Defendants.

3. I have been asked for my opinions regarding a client-server system described in U.S. Patent 5,550,965, issued to Gabbe et al. (the “‘965 patent” or “Gabbe”), which was cited by the United States Patent and Trademark Office (“USPTO”) during prosecution of the ‘504 patent, and the patentee’s statements to the USPTO regarding the client-server system.

II. Qualifications

4. I have been working or studying in the field of computer science, software programming, design, and engineering for over 30 years. I earned my Bachelor of Science degree in Computer Science from California State University, Dominguez Hills, in 1986. I received my Master of Science degree in Computer Science in 1988 and my Doctor of Philosophy degree in Computer Science in 1991, both at the University of California, Irvine.

5. I am currently a Professor of Computer Science at the University of Maryland at College Park, and have an appointment with the University of Maryland Institute for Advanced Computer Studies. I joined the University of Maryland faculty in August 1991 as a Lecturer. I was promoted to Assistant Professor in December 1991, to Associate Professor with tenure in August 1998, and to Full Professor in August 2007. From July 2007 to June 2009, I served as the Associate Director of the University of Maryland Institute for Advanced Computer Studies. I have also been a Visiting Professor at several foreign universities, including the Dipartimento di Elettronica e Informazione at Politecnico di Milano, the Dipartimento di Scienze della Comunicazione at Universita della Svizzera Italiana, the Libera Universita’ di Bolzano, and the

Leopold-Franzens-Universitat Innsbruck. I am currently working as a Visiting Scientist for the Software Engineering Institute at Carnegie Mellon University.

6. At the University of Maryland, my research has focused on the dynamics of large-scale software development, to identify the fundamental mechanisms driving the costs and benefits of different software tools and methods in a quantitative sense. My approach has emphasized empirical studies in both small, controlled environments and real-life industrial projects. My current research interests include large-scale, distributed, continuous quality assurance, software regression testing, mobile application development, programmer productivity in high performance computing environments, and autonomic systems. I have been the primary advisor for at least six Ph.D. students and have been on the doctoral committee for at least thirty-five students.

7. Based on my research, I have published over 30 articles in refereed journals in the field of computer science and software engineering, and I have published over sixty papers in refereed conference proceedings. I have also edited books and written book chapters on software design and analysis of software systems. My 1990 paper, "Empirically guided software development using metric-based classification trees," *IEEE Software*, 7(2):46-54, March 1990 (co authored with Richard W. Selby) was identified as one of the twenty most-widely cited articles in the over twenty-five-year history of the *IEEE Software* journal.

8. I have served on the editorial boards of top technical journals. I was an Associate Editor of the *IEEE Transactions on Software Engineering* from 2006 to 2011. I was an Associate Editor of the *ACM Transactions in Software Engineering Methodology* from 1997 to 2003.

9. I have been teaching at the University of Maryland for the past 23 years, including graduate and undergraduate courses on the theory and implementation of programming languages, software design and development, wide-area software development, programming

language technologies and paradigms, mobile application development, and advanced software engineering.

10. For at least the past four years, I have devoted a substantial amount of my teaching and research on programming for smartphone mobile devices such as the Apple iPhone and devices running on Google, Inc.'s Android Platform. Starting in the summer of 2008, I worked with Evan Golub of the University of Maryland and Chuck Pisula of Apple, Inc. to create the University of Maryland's first course in programming for mobile applications, focused on Apple's iPhone platform.

11. In addition, I have been a technical consultant for Sun Microsystems, Lucent Bell Laboratories, the Software Productivity Consortium, Motorola, MCC, IBM, and the United States Navy. I have also been a member of the technical staff at Hughes Aircraft Co. and Contel Co.

12. I am a named co-inventor on U.S. Patent No. 7,181,651 ("Detecting and Correcting a Failure Sequence in a Computer System Before a Failure Occurs").

13. My *curriculum vitae* are attached to this report as Exhibit A, which includes a list of all publications I've authored over the previous 25 years.

14. With my experience of programming hand-held systems and internet-enabled applications, I am knowledgeable and if asked will testify on the areas of computer science and software engineering, and particularly on the matter set forth herein.

III. Person of Ordinary Skill in the Art

15. In the 1996 time frame, a person of ordinary skill in the art would have had a Bachelor's degree in Computer Science, Computer Engineering, Electrical Engineering, or the equivalent knowledge; at least one year of computer programming experience; and experience using or developing client-server systems.

IV. The '965 Patent

16. The '965 patent discloses a "client-server network," which is illustrated in figure 6. '965 patent at 12:26-32. The "client-server" network includes "an episode server 500, a network manager 570, [and] a plurality of participating clients 600." *Id.* at 12:33-36. "The participating clients 600 are workstations which support a graphical user interface." *Id.* at 12:45-46. The network manager is positioned between each client workstation 600 and the episode server 500, *see* figure 6, and the network manager "provides communication, switching, and control functions between ones of the participating clients 600 and the episode server 500." *Id.* at 12:56-59. Accordingly, "[t]he participating clients 600 and the episode server 500 communicate via [the] network manager 570." *Id.* at 12:46-48. The '965 patent teaches that the network manager 570 may communicate with the client workstations 600 and episode server 500 using network protocols, such as "TCP/IP." *Id.* at 12:49-50.

17. The '965 patent further teaches that a client workstation 600 may request information (e.g., media content such as video-data) from the episode server 500. *See e.g., id.* at 14:14-19 ("block 524 allows the user to select index assembly output 518 in the form of replays of the primary data 102, presentations of media representations 202, presentations of table of contents 302 displays, and presentation ancillary data 530 displays via client requests 512"); *and id.* at 5:28-29 ("Primary data 102 encompasses ... video-data"). In response to a request from a client workstation 600 for information provided by the episode server 500, the episode server 500 "will access the appropriate record [*i.e.*, the requested information] for the user in the archive 670 and display the record as output on a participating client's graphical user interface." *Id.* at 14:20-22.

18. During prosecution of the '504 patent, the patentee distinguished its claim 31 from the '965 patent by repeatedly asserting that "Gabbe [the '965 patent] does not *store* either

media content or the episode table of contents on the client workstations 600, but instead streams this information to the workstations from central storage in response to client requests.”

Amendment filed January 2, 2011 at 19 (emphasis added); *see also id.* at 19 (“Gabbe, like Clanton, does not contemplate storing media files of any kind at the client workstations”); *id.* at 22 (“as discussed above in connection with claim 1, Gabbe’s table of contents data is not transferred to and stored in a media player’s digital memory”); *and id.* at 22-23 (“Gabbe’s table of contents data is instead stored on the server side and is streamed to the client workstation for display at the client workstation in response to a user request”).

19. A person of ordinary skill in the art in the 1996 time frame would have understood, however, that when data (i.e., the media content or the episode table of contents) is streamed to the client workstation 600 described in Gabbe, that client workstation 600 must store the streamed data, at least temporarily, so that the client workstation 600 can make use of it (e.g., display the episode table of contents to the user). If the data were not stored by the client workstation at least in such a temporary manner, then the data could not be output to the user. Such a person would therefore further understand that, when the patentee argued that “Gabbe does not *store* either media content or the episode table of contents on the client workstations 600, but instead streams this information to the workstations from central storage in response to client requests,” the patentee had to be taking the position that Gabbe does not disclose that the client workstation 600 stores the data transmitted to it in a non-temporary manner for later use. That is, such a person would understand that the patentee was taking the position that Gabbe discloses that the client work station 600 stores the data in a temporary manner so that the client workstation 600 can utilize (e.g., display) the data upon receipt of the data, and that the client workstation 600 then discards the data without otherwise storing the data in such a way that it is available for later use.

20. Therefore, the person of ordinary skill in the art would have understood that the patentee of the '504 patent was stating that the claimed invention of the '504 patent requires transferring media content and episode table of contents data to the client workstation, which then stores the data in a non-temporary manner such that it is available for later use, and that "streaming" such data to a client (i.e., transmitting such data to a client that merely stores the data temporarily so that the client can process and output the data upon receipt) does not meet this requirement.

IV. Compensation

21. I have been retained by counsel for the Defendants as an expert in connection with this case. I will be compensated for my time at an hourly rate of \$550.00, and I will be reimbursed for my expenses. This compensation does not depend in any way on the outcome of this case.

I declare under the penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Executed on: 12/19/2013

Patents

- Detecting and correcting a failure sequence in a computer system before a failure occurs. United States Patent #7,181,651. With Gross, Kenny C. and Votta, Lawrence G. Jr., Awarded Feb. 2007.

Grants and Contracts

- International Travel Award, National Science Foundation CCR-921410, \$1000, Feb. 1992, PI.
- Measurement-Driven Modeling to Direct Software Maintenance, General Research Board, University of Maryland, \$5400, July 1992-June 1993, PI.
- Forecasting Software Error Classes, IBM, \$23,500, July 1992-December 1992, PI.
- Formal Requirements Inspections IBM, \$23,500, July 1993-December 1994, PI.
- Empirical Investigation of Software Inspections, General Research Board, University of Maryland, \$6500, July 1995-June 1996, PI.
- Faculty Early Career Development Award: Empirical Investigation of Software Inspections, National Science Foundation, CCR-9501354, \$128,000 Aug. 1995-Aug 1998, PI.
- The Cycle-time Reduction Laboratory, AT&T Foundation, \$55,000, January 1996, PI.

- Code Decay in Legacy Software Systems: Measurement, Models and Statistical Strategies, National Science Foundation, SBR-9529926, \$255,000 (\$7400 to UMD), Jan. 1996- March 31, 2000, with Stephen Eick and Alan Karr. (PI on subcontract).
- Scalable Program-Analysis-Based Testing and Maintenance: Infrastructure and Experimentation National Science Foundation, CCR-9707792, \$1,612,531 (\$456407 to UMD), September 1997- Aug. 2002, Co-PI with Mary Jean Harrold, Renee Miller, and Gregg Rothermel.
- Empirical Investigations of Large-Scale Regression Testing, National Science Foundation, CCR-0098158, \$275,000, Sep. 2001 – Aug. 2005, PI.
- Workshop on New Visions for Software Design and Productivity, National Science Foundation, CCR-0138554, \$20,000, Jan. 2002 – Dec. 2002, Co-PI with Janos Sztipanovitz.
- Collaborative Research: ITR: Acquiring Accurate Dynamic Field Data Using Lightweight Instrumentation, National Science Foundation CCR-0205265, CCR-0205118, CCR-0205429, CCR-0205627, and CCR-0205422, \$2,250,000 (\$606,000 to UMD), PI with Alan Karr, Douglas Schmidt, David Notkin, Mary Jean Harrold, Alessandro Orso, and Richard Lipton. Sept. 2002 – Aug 2007.
- Lightweight, Distributed Dynamic Analysis Techniques, DARPA, \$50,000. Oct. 2002 – March 2003, PI.
- Sun Microsystems, Gift. \$20,000 + ~\$20,000 in equipment. 2004, PI.
- ONR-DURIP: A Testbed for Distributed, Continuous Quality Assurance of DoD Combat Systems, Office of Naval Research N00014-05-1-0421, \$206,136 (\$103,086 to UMD) for equipment. Co-PI with Aniruddha Gokhale, Atif Memon, Douglas Schmidt and Balachandran Natarajan. May 1, 2005 – April 30, 2006.
- Sun Microsystems Contributory Grant# EDU-Q206-176A, \$10,048.07 for equipment. Nov. 2005, Co-PI with Atif Memon.
- Around-the-World, Around-the-Clock Software Performance Testing, General Research Board, University of Maryland, \$8750, Summer 2006, PI.
- REU Supplement to Collaborative Research: ITR: Acquiring Accurate Dynamic Field Data Using Lightweight Instrumentation, National Science Foundation, CCF-0630831, \$6000. June 2006 – August 2006, PI.
- Software Wind Tunnel (SWiT) Capabilities, Lockheed Martin ATL, \$25,000, 10/12/2006 – 1/31/2007, PI.
- Using Distributed Continuous Quality Assurance to Support Certification of Dynamic Systems, Raytheon Inc., \$10,000. 12/2006-1/2007, PI.
- Rapid Design-Time Certification of Discrete System Configurations for DARPA IXO Seedling, Raytheon Inc., \$50,000, 2/2007 – 6/2007. PI.
- CPA-SEL: Testing Systems with Large and Complex Test Spaces: Techniques, Tools and Empirical Studies, National Science Foundation, CCF-0811284, \$350,000, 6/1/08-5/31/2011, PI.
- A Proposal for a Systems Engineering Research: University Affiliated Research Center, NSA, 1/1/2009-12/31/2014, \$10,000,000 (est.), Senior Scientist.
- Location Aware Polling Service, Google Inc., equipment, \$8700. PI with Douglas Schmidt.
- Project Hawaii, Microsoft, equipment, \$8000 (est.), with Ashok Agrawala
- SHF: Small: Empirical Studies, Principles and Techniques for Software Systems with Complex Configuration Spaces, CCF-1116740, \$500,000, 7/1/11-6/30/14, Co-PI with J. Foster.
- DURIP: Knowledge Cloud Computing Research, DoD, \$250,000, with Christopher White (Virginia Technical University) and Aniruddha Gokhale (Vanderbilt U).
- Mobile Phone Equipment Gift, Google Inc., equipment, \$5000 (est.).
- Amazon Web Services Education Grant, Amazon Inc., \$4500 (computing credit)
- Research Development, Test and Evaluation (DASN RDT&E) Open Architecture, PWS 5-344AF, \$200,000, 10/12/11-9/30/12, through SEI as Senior Scientist
- Research Development, Test and Evaluation (DASN RDT&E) Open Architecture, PWS 5-344AF, \$200,000, 10/12/12-9/30/13, through SEI as Senior Scientist.
- Tomorrow's CS Education, private donors, up to \$1,000,000, 9/2013-8/2018. Led proposal preparation with B. Bederson.

Grants and Contracts in Submission

- NA

Fellowships, Prizes and Awards

- Mobile Learning Fellow, 2010, UMD OIT/Center for Teaching Excellence.
- Recognized as one of 12 (out of 334) top technical reviewers for the ACM Transactions on Software Engineering for 2007-2008.
- A.A. Porter and R.W. Selby, "Empirically Guided Software Development Using Metric-Based Classification" was listed as one of the 20 most-widely cited articles published in the 25 year history of IEEE Software.
- UMD Graduate Research Board Summer Award, 2006
- Senior Member, ACM, 2006.
- Senior Member, IEEE, 2003.
- NSF Faculty Early Career Development Award, 1995–1998.
- Dean's Award for Excellence in Teaching, University of Maryland, CMPS, 1995.
- UMD Graduate Research Board Summer Award, 1993
- Howard Hughes Ph.D. Fellow, Hughes Aircraft Co., Fullerton, CA, 1990–91.
- Patricia Roberts Harris Fellow, UC/Irvine, CA, 1988–89.
- Faculty Mentor Program Fellow, UC/Irvine, CA, 1987–88.
- University of California Regents Fellow, UC/Irvine, CA, 1986–87.

Editorial Boards

- 1997 – 2003: Associate editor, ACM Transactions on Software Engineering Methodology.
- 2006 – 2011: Associate editor, IEEE Transactions on Software Engineering.

Teaching and Advising

Courses Taught

- Spring 1992: CMSC 330: Organization of Programming Languages, 100 students
- CMSC 838P: Special Topics in Software Engineering, 25 students
- Fall 1992: CMSC 330: Organization of Programming Languages, 90 students
- Spring 1993: CMSC 630: Theory of Programming Languages, 25 students
- Fall 1993: CMSC 630: Theory of Programming Languages, 30 students
- Spring 1994: CMSC 435: Software Design and Development, 40 students
- Fall 1994: CMSC 330: Organization of Programming Languages, 60 students
- Spring 1995: CMSC 435: Software Design and Development, 45 students
- Fall 1995: CMSC 330: Organization of Programming Languages, 130 students
- Spring 1996: CMSC 838P: Wide-Area Software Development, 25 students
- Fall 1996: MSWE 607: Software Life Cycle Methods and Techniques, 27 students
- Spring 1997: Fall 1999: CMSC 435 Software Design and Development, 40 students
- Fall 1997: CMSC 435: Software Design and Development, 40 students
- Spring 1998: CMSC 330: Organization of Programming Languages, 100 students
- Fall 1999: CMSC 435: Software Design and Development, 40 students
- Spring 2000: CMSC 838P: CMSC 838Q - Object-Oriented Design Patterns for Distributed and Concurrent Systems, 5 students
- Fall 2000: CMSC 435: Software Design and Development, 45 students
- Spring 2001: CMSC 435: Software Design and Development, 45 students
- Fall 2001: CMSC 433: Programming Language Technologies and Paradigms, 40 students
- Spring 2002: CMSC 433: Programming Language Technologies and Paradigms, 50 students
- Fall 2002: CMSC 433: Programming Language Technologies and Paradigms, 45 students

- Spring 2003: CMSC 838P: Internet-Scale Software Engineering: Leveraging Fielded Resources, 10 students.
- Fall 2003: CMSC 433: Programming Language Technologies and Paradigms, 40 students
- Spring 2004: CMSC 838P: Software Engineering: Remote Analysis and Measurement of Software Systems, 5 students.
- Fall 2004: CMSC 433: Programming Language Technologies and Paradigms, 52 students
- Spring 2005: CMSC 838P: Research in Software Engineering, 15 students
- Fall 2006: CMSC 838P: Research in Software Engineering, 8 students
- Fall 2007: CMSC 634: Empirical Research Methods for Computer Science, 18 students
- Spring 2008: CMSC 433: Programming Language Technologies and Paradigms, 34 students
- Fall 2008: CMSC 433: Programming Language Technologies and Paradigms, 32 students
- Spring 2009: CMSC 433: Programming Language Technologies and Paradigms, 34 students
- Fall 2009: CMSC 433: Programming Language Technologies and Paradigms, 32 students
- Spring 2010: CMSC 498I: Selected Topics in Computer Science: Programming the iPhone, 32 students (with Chuck Pisula and Evan Golub)
- Spring 2010: CMSC 838Z - Advanced Topics in Programming Languages: Research in Software Engineering, 6 students
- Fall 2010: CMSC 498I: Selected Topics in Computer Science: Programming the iPhone, 19 students
- Fall 2010: CMSC 498G: Selected Topics in Computer Science: Programming Android, 9 students
- Spring 2011: CMSC 433: Programming Language Technologies and Paradigms, 40 students
- Fall 2011: CMSC 436: Programming Handheld Devices, 44 students
- Spring 2012: CMSC 433: Programming Language Technologies and Paradigms, 44 students
- Fall 2013: CMSC 436: Programming Handheld Systems, 50 students
- Spring 2013: CMSC 433: Programming Language Technologies and Paradigms, 50 students

Teaching Innovations

- **Experimental Laboratory Exercises:** Developed classroom laboratory exercises in which students experimentally test hypotheses about software engineering processes. The students also receive instruction on statistics which they use to analyze the data from their experiments in the classroom. I have developed four such laboratories which are currently being used by several professors around the world.
- **Very-Large Scale Software Development.** Redesigned CMSC 435 so that students must work together to develop one very large-scale software package. Projects have been on the order of 50,000 lines of code (with J. Purtilo).
- **The Cycle-Time Reduction Laboratory** - Won funding to create an educational lab for developing computer-supported cooperative work applications. This lab is used in conjunction with the CMSC 435 course.
- **Revising Graduate Software Engineering course.** Redeveloped course materials and changed teaching style to stress a “conversational” learning approach in which students take a greater role in the classroom learning process.
- **Developed new course on Programming SmartPhone Applications.** Working with Evan Golub (UMD) and Chuck Pisula (Apple Inc.) I created a new course on programming Apple iPhone applications.
- **Developed new course on Programming SmartPhone Applications.** I created a new course on programming Android smartphone applications. This course is listed on Google’s University Consortium Website (<https://developers.google.com/university/courses/>)
- **Developer flipped classroom approach for CSMC436, Programming Handheld Systems.** I created videotaped lectures and quizzes to support course. These are available at learn-android.appspot.com.

This course is listed as exemplar on Google's Google CourseBuilder website at <https://code.google.com/p/course-builder/>

- **Developed and delivered MOOC course on the Coursera MOOC platform entitled, Programming Handheld Systems with Android.** This course has over 70,000 students enrolled from all over the world. The course was designed as part of a multi-course sequence, delivered with Dr. Douglas Schmidt and Dr. Jules White of Vanderbilt University. This was the first trans-institutional MOOC ever offered.

- Vidhi Bhansali, 2002
- Lee Ellis, NSF-REU summer 2006, independent study Fall 2006
- Matthew Dzaman (Georgetown), 2008
- Andre Rasevic, 2010
- Sameet Narula, 2011
- Robert Henderson, 2011
- Pratik Mathur, 2011

Doctoral Committee

- William Thomas
- Jianhui Tian
- Eduardo Ostertag Jenkins
- William Martschenko
- Christine Hofmeister
- Salwa Abdel-Hafiz
- Elizabeth White
- Chen Chen
- Carolyn Seamans
- Jim Bowman
- Jim Welch
- Kritchalach Thitikamol
- Mehrdad Hassani
- Daniel Yankelovich
- Manuel Rodriguez
- Daniel Savarese
- Hyeonsang Eom – 5/2003
- Hyunmo Kang - 12/2003
- Lance Good – 12/2003
- Jeremy Mason – 12/2004
- Jamie Spacco – 8/2006
- Arvind Krishna – 11/2005 Vanderbilt University
- Qing Xie - 8/2006

- Ankush Varma – 4/2007
- Amy Karlson - 11/2007
- Christian Halaschek-Wiener - 11/2007
- Scott McMaster – 4/2008
- Xun Yuan – 8/2008
- Penelope Brooks – 9/2009
- Hamid Haidarian Shahri – 7/2011
- Nick Rutar – 8/2011
- Geoff Stoker
- Ananta Tiwari
- Gary Johnson
- Gleneesha Johnson

Doctoral Students: Primary Advisor

- Harvey Siy, Ph.D. 1996, First position – AT&T/Lucent Bell Laboratories
- Jung Min Kim, Ph.D. 2001. First position - Hyundai Inc.
- Cemal Yilmaz, Ph.D. 2005. First position - IBM TJ Watson Research Center
- Sandro Fouche', Ph.D. 2010. First position – Towson University
- Il-Chul Yoon, Ph. D. 2010. (Co-advised with Alan Sussman and Atif Memon). First position UMD Robert Smith School of Business)
- Charles Song, Ph.D. 2011. First position – Fraunhofer Institute
- Teng Long, Ph.D.

Service

Conferences

- Program Committee, Conference on Computer Assurance, Gaithersburg, MD, 1993.
- Session Chair, NASA - SEL Workshop. Greenbelt, MD, 1993.
- Program Committee and Session Chair, NASA - SEL Workshop. Greenbelt, MD, 1994.
- Program Committee, International Symposium on Software Metrics, Berlin, Germany, 1995.
- Program Committee and Session Chair, International Workshop on Empirical Studies of Software Maintenance, Monterey, CA, 1996.
- Program Committee and Session Chair, International Conference on Software Engineering, Boston, MA, 1997.
- Program Committee, Conference on Domain-Specific Languages, Santa Barbara, CA, 1997.
- Program Committee, International Workshop on Empirical Studies of Software Maintenance, Bari, Italy, 1997.
- Program Committee, International Conference on Software Engineering, Kyoto, Japan, 1998.
- Program Committee, International Conference on Software Engineering, Los Angeles, CA, 1999.
- Program Committee, Symposium on the Foundations of Software Engineering, San Diego, Nov. 2000.
- Program Committee, International Conference on Software Engineering, Toronto, Canada, May 2001.
- Program Committee, Symposium on the Foundations of Software Engineering, Charleston, SC, Nov. 2002.
- Program Committee, International Conference on Software Engineering, Portland, OR, May 2003.
- Co-organizer, Workshop on Remote Analysis and Measurement of Software Systems (RAMSS) at ICSE-2003, Portland, Oregon, May 9, 2003.
- Co-organizer, 2nd Workshop on Remote Analysis and Measurement of Software Systems (RAMSS) at ICSE-2004, Edinburgh, Scotland, UK, May 2004.
- Co-organizer, International Workshop on Software Engineering for High Performance Computing System (HPCS) Applications, Monday, May 2004.
- Co-organizer, 2nd International Workshop on Software Engineering for High Performance Computing System (HPCS) Applications at ICSE-2005, St. Louis, MO, May 2005.

- Program Committee, 11th International Software Metrics Symposium. September 2005, Como, Italy.
- Program Committee, 13th Asia Pacific Software Engineering Conference, Bangalore, India, Dec. 2006.
- Program Committee, International Conference on Empirical Software Engineering and Measurement (ESEM 2007), Madrid, Spain, September 2007.
- Co-organizer, Special Session on: Certification of Dynamic and Adaptive Systems at The International Workshop on Parallel and Distributed Real-Time Systems, Long Beach, CA, March 2007.
- Program Committee, 3rd International Workshop on Software Engineering for High Performance Computing Applications, Minneapolis, MN, May 2007.
- Program Committee, Workshop on Automating Service Quality, Atlanta, Georgia, USA, Nov. 2007.
- Program Committee, First India Software Engineering Conference (ISEC2008), Hyderabad, Feb. 2008.
- Program Committee, First International Workshop on Multicore Software Engineering, Liepzig, Germany, March 2008.
- Program Committee Sixth International Workshop on Dynamic Analysis (WODA 2008), Seattle, WA, July 2008.
- Program Committee: ACM SIGSOFT 2008 / FSE 16 Doctoral Symposium, Atlanta, GA, Nov. 2008.
- Program Committee, Second International Workshop on Multicore Software Engineering, Victoria, BC, Canada, March 2009.
- Program Committee, IEEE International Symposium on Software Reliability Engineering (ISSRE 2009), Bangalore-Mysore, India, Washington, November 15-18, 2009.
- Program Committee, The 11th International Conference on Agile Software Development, Trondheim, Norway, June 1-4, 2010.
- Program Committee, 1st International Workshop on Regression Testing, March 2011, Berlin, Germany
- Program Committee, The 12th International Conference on Agile Software Development, Madrid, Spain, May 10-13, 2011.
- Program Committee, "New Ideas and Emergent Results" (NIER) track at ICSE'11, May 2011.
- Program Committee, Ninth International Workshop on Dynamic Analysis, July 2011.
- Program Committee, 12th International Conference on Agile Software Development, Madrid, Spain, May 2011.
- Program Committee, 24th IEEE Conference on Software Engineering Education and Training Waikiki, Honolulu, Hawaii, May 22, 2011.
- Program Committee, The 2nd International Workshop on Regression Testing (Regression 2012), Quebec, Montreal, Canada, April 2012.
- Program Committee, 13th International Conference on Agile Software Development, Malmo, Sweden, May 2012.
- Program Committee, International Conference on Software Engineering, Zurich, Switzerland, May 2012.
- Program Committee, First Intl. Workshop on Conducting Empirical Studies in Industry (CESI 2013), May 2013.
- Program Committee, Tutorials and Technical Briefing subcommittee, International Conference on Software Engineering, Hyderabad, India, June 2014.
- Program Committee, International Workshop on the Engineering of Mobile-Enabled Systems Hyderabad, India, June 2014.
- Program Committee, First Intl. Workshop on Conducting Empirical Studies in Industry (CESI 2014), Hyderabad, India, June 2014.
- Program Committee, The 15th International Conference on Agile Software Development May 26-30, 2014, Rome, Italy

Funding Review Panels

- National Science Foundation 1997
- National Science Foundation 2001
- National Science Foundation 2009

- National Science Foundation 2012

Professional Service

University

- 2008-2009 - Search Committee Office of Information Technology Director of Software Development
- 2009-2011 – CMPS/CMNS APT Committee
- 2011-present – UMIACS Web Visionary (support redesign on institute's web presence).
- 2013-2014 - Search Committee for Associate Provost and Director for the Teaching and Learning Transformation Center

Department

- 1991-1992 - Comprehensive exam development
- 1992-1993 - Comprehensive exam development
- 1992-1993 - Graduate Student Orientation
- 1992-1993 - Graduate Student Admissions Committee
- 1992-1993 - Faculty advisor: Student Chapter Association for Computing Machinery
- 1993-1994 - Faculty advisor: Student Chapter Association for Computing Machinery
- 1993-1994 - Directed comprehensive exams for SE/PL field committee
- 1994-1995 - Faculty advisor: Student Chapter Association for Computing Machinery
- 1994-1995 - Comprehensive exam development
- 1995-1996 - Faculty advisor: Student Chapter Association for Computing Machinery
- 1995-1996 - Teaching Evaluation Committee
- 1996-1997 - Department Council
- 1999-2001 - Department Council
- 2000-2001 - Department Council
- 2000-2001 - Hiring Committee
- 2000-2001 - Proposal development for information technology degree program
- 2000-2001 - Committee for Hinman CEO's program
- 2000-2001 - Committee for professional masters degree in computer science
- 2000-2001 - Department Council
- 2001-2002 - Department Council
- 2001-2002 - Salary Committee
- 2001-2002 - Faculty Retreat presentation on limiting enrollment
- 2001-2002 - APT review
- 2002-2003 - Committee on revising undergraduate curriculum
- 2002-2003 - APT Review
- 2003-2004 - Lab committee
- 2003-2004 - Teaching Evaluation Committee
- 2004-2005 - Lab committee
- 2004-2005 - Dean's Fellowship for Outstanding Graduate Student selection committee
- 2006-2008 - Chaired committee to evaluate changes to undergraduate curriculum
- 2007-2008 - Host/Mentor to Prof. Mei Hong of Sichuan University, PRC
- 2007-2008 - APT committee
- 2007-2008 - APT review
- 2008-2009 UMIACS APT committee
- 2008-2009 CS Salary Committee
- 2008-2009 Review Committee ACM Dissertation Award
- 2008-2009 Middle States Evaluation Ph.D. defense subcommittee.
- 2009-2010 - Host/Mentor to Prof. Qiuhui Yang of Sichuan University, PRC

- 2009-2010 - Middle States Evaluation of CMSC 737.
- 2009-2010 – APT committee (for external applicant)
- 2010-2011 – APT committee
- 2013-2014 – APT Committee
- 2013- CS Education for Tomorrow program director

External

- 2007-2008 APT Committee Georgetown University
- 2008-2009 APT Committee Georgetown University
- 2008-present Member of Scientific Advisory Committee, Center for Applied Software Engineering, Free University of Bolzano-Bozen
- Instructor, Case Summer School On Applied Software Engineering Applied Software Process Management And Testing July 6-10, 2009, Bozen/Bolzano, Italy
- Short course, May-June 2010, Free University of Bolzano-Bozen, Bozen/Bolzano, Italy
- Short course, June 2010, Leopold-Franzens-Universität Innsbruck, Innsbruck, Austria
- Short course, July 2011. Programming the Android Platform, Sichuan University, PRC.
- Founding Co-Chair, SIGSOFT Outstanding Doctoral Dissertation Award program. 2011
- Carnegie Mellon University, Software Engineering Institute, Technical Advisory Group, 2012
- Advisory Board Member - Advanced Mobility Academic Research Center, 2013
- Short course, June 2013. Programming Handheld Systems with Android, Sichuan University, PRC.

Community Outreach

- 1995. Organized Summer Educational Lab for local Hispanic high school students.
- 1997. Organized 2-day course on technical writing for local Hispanic college students.
- 2002. Served as mentor for the Ronald E. McNair Post-Baccalaureate Achievement program.
- 2005. Discussant for Gemstone thesis project.
- 2006: Faculty mentor: UMD Leaders for Tomorrow Program
- 2006: Faculty mentor: STAND Internship Research Program
- 2011-present: Member, Board of Trustees, The Green Acres School, North Bethesda, MD

Panels and Workshops

- Panelist, National Academy of Sciences, “Toward and Every-Citizen Interface to the National Information Infrastructure, 1996.
- Panelist, NSF/DARPA Workshop on New Visions for Software Design and Productivity, 2001.
- Co-organizer: NSF Workshop on New Visions for Software Design and Productivity: Research and Applications. Vanderbilt University. December 12-15 2001.
- Co-organizer: 1st International Workshop on Remote Analysis and Measurement of Software Systems, May 2004.
- Co-organizer: 2nd International Workshop on Remote Analysis and Measurement of Software Systems, May 2005.
- Co-organizer, 1st International Workshop on Software Engineering for High Performance Computing System (HPCS) Applications, May 2004.
- Co-organizer, 2nd International Workshop on Software Engineering for High Performance Computing System (HPCS) Applications, May 2005.
- Co-organizer, Workshop on Distributed and Parallel Real Time Systems: Special Session on Certification of Dynamic and Adaptive Systems. March 2007.
- Co-organizer, Second International Workshop on Multicore Software Engineering, Victoria, BC, Canada, March 2009.
- Co-organizer, 1st International SmartPhones in the Curriculum Workshop, May 2011.
